

Syed Abdul Aman

Generative AI Developer & Data Analyst

Mahbubnagar, Telangana | +91 8688822733 | amanbaba9404522@gmail.com
[LinkedIn Profile](#) | github.com/P-r-e-m-i-u-m

PROFESSIONAL SUMMARY

Innovative AI Developer and Data Analyst with experience in LLMs, NLP, and Data Engineering. Certified by IBM and Databricks. Proven expertise in building RAG architectures, automating ETL pipelines, and deploying Machine Learning models. Adept at using Python, SQL, and AWS to solve business problems. Seeking to leverage skills in Prompt Engineering and Predictive Analytics to drive organizational growth.

TECHNICAL SKILLS

AI & Machine Learning: Generative AI, OpenAI API, LangChain, RAG, Hugging Face, Scikit-Learn, NLP, Pinecone.
Data Engineering: ETL Pipelines, SQL (MySQL, PostgreSQL), Pandas, NumPy, Web Scraping (Selenium), Cleaning.
Visualization & BI: Power BI, Tableau, Advanced Excel (VBA, Power Query), Matplotlib, Seaborn.
Development & Cloud: Python, Java, REST APIs, Git, Docker, CI/CD, AWS (S3, EC2), Linux, VS Code, Streamlit.
Soft Skills: Critical Thinking, Problem Solving, Communication, Adaptability.

PROFESSIONAL EXPERIENCE

- Freelance AI Engineer (Project-Based)**
Intelligent Document Processing System (RAG)

Remote
Jan 2024 – Present

 - Architected a Retrieval-Augmented Generation (RAG) pipeline using LangChain and Pinecone to ingest technical PDFs, achieving 95% retrieval accuracy.
 - Integrated OpenAI GPT-4 API to generate context-aware summaries, reducing manual document review time by 70%.
 - Implemented optimized document chunking algorithms to handle token limits and reduce API latency by 40%.
- Python Developer (Self-Employed)**
AI-Powered ATS Resume Optimizer

Remote
Nov 2023 – Dec 2023

 - Developed a full-stack AI application using Python and Streamlit to analyze resumes against Job Descriptions.
 - Engineered prompt logic to improve keyword matching, resulting in a 40% increase in ATS scoring for users.
 - Deployed the application prototype using Docker containers for consistent runtime environments.
- Data Analyst (Independent Project)**
Automated ETL Data Pipeline

Remote
Sep 2023 – Oct 2023

 - Designed and executed an automated ETL pipeline to extract data from public REST APIs (10k+ records).
 - Performed data transformation and cleaning using Pandas, ensuring 100% data integrity for SQL loading.
 - Created automated error-handling scripts to manage rate limits and pagination, eliminating manual data entry.
- Financial Analyst (Project)**
Executive Dashboard Development

Remote
Aug 2023 – Sep 2023

 - Developed an interactive dashboard using Advanced Excel and Power Query to visualize financial KPIs.
 - Automated monthly reporting workflows for 1,000+ transaction rows, identifying a 15% cost-saving opportunity.

CERTIFICATIONS & EDUCATION

- IBM AI & Data Science Professional Certificate**
Skills: Python for Data Science, AI Methodology, SQL, Data Analysis

Coursera / IBM
2024
- Generative AI Fundamentals**
Skills: Large Language Models (LLMs), RAG Architecture, Deployment

Databricks
2024
- Specializations:** Intro to GenAI, GenAI Studio, ChatGPT Advanced
GenAI Powered Data Analytics

2024
2024
- Secondary Education (High School Diploma)**
Focus: Mathematics, Computer Science
